LAB . CELL STUDIES A. ANIMAL CELLS: HUMAN CHEEK CELLS LAB _____. CELL STUDIES The cell theory states that all living organisms are made of cells. It was only after microscopes were developed and we were able to view the universality of cells that this theory was accepted. Although cells are the building block of all living organisms, different types of organisms have different types of cells. Mar 2th, 2024 Glial cells as progenitors and stem cells: new roles ... Glial cells can generate when exposed to a different environment in vivo or in vitro. The reactivation of stem and progenitor properties in some apparently differentiated glial cells will bring us back to the issue of heterogeneity, asking to which extent these glial cells with a broader potential may be a special.
