Will consist of a series of empirical problems to be solved using Stata and submitted electronically. Final Exam: The final exam is cumulative. Like the midterm, the final will include a series of empirical problems to be solved using Stata and submitted electronically. This is the first course in the three-course sequence "Empirical Analysis": ECON 643, ECON 644, and ECON 645. It provides students with a foundation for methods and applications used to conduct empirical research in economics. Main topics include probability theory, estimation and statistical inference. An empirical assessment of empirical corporate finance. We empirically evaluate 20 prominent contributions to a broad range of areas in the empirical corporate finance literature. We assemble the necessary data and then apply a single, simple econometric model. There is a lot of books, user manual, or guidebook that related to empirical formula determination.
