Columns With End Restraint And Bending In Load And ...

Steel Column, The Nonlinearity Of The Average Stress-strain Behavior Of The Cross-

section is due to the presence of residual stress. Residual stresses arise as a result of the manufacturing process. When a compressive axial force is applied to a stub column (very short column), the fibers that have compressive residual stresses will yield first. 1th, 2024

Design Of Densely Reinforced Concrete Walls And Columns

In thin reinforced concrete walls, the same problem happens as in other densely reinforced concrete structures. Due to a tight reinforcement net, aggregates are separated from cement and get stuck between rebars. Ultimately it leads to unequal distribution of concrete mass. In reinforced concrete walls openings have dense reinforcement. (1.) 1th, 2024
