Turing Machines - Stanford University

Decision Problems A decision problem is a type of problem where the goal is to provide a yes or no answer. Example: Checking arithmetic. Given x, y , and z , is $x+y=z$? Example: Detecting relationships. Given a family tree T and people x and y , is x a grandparent of y ? Example: Avoiding traffic.

Turing Machines: An Introduction - University of Pennsylvania

Turing Machines: An Introduction A Turing machine is somewhat similar to a finite automaton, but there are important differences: 1. A Turing machine can both write on the tape and read from it. 2. The read-write head can move both to the left and to the right. 3. The tape is infinite. 4.
